5. Impact Metrics

Overview

Bell Material Solutions (BMS) builds circular supply chains by turning industrial byproducts into feedstocks.

This packet provides an overview of our business model, investment thesis, and impact potential.

Business Model

Revenue streams: material resale, processing service fees, ESG reporting solutions.

Unit economics: margins improve with scale as logistics are optimized and hubs expand.

Why Now

Brands are under regulatory and consumer pressure to divert waste and cut Scope 3 emissions.

BMS provides both cost savings and measurable ESG value.

Use of Funds

Capital will support equipment acquisition, hub leases, and initial staffing.

Grant and blended finance will accelerate expansion across multiple regions.

Impact Metrics

Tons diverted per month from landfill.

tCO₂e avoided through repurposing vs. disposal.

ESG reporting alignment for partners like Nike and regional manufacturers.
