

Bell Material Solutions

Investor Packet

Prepared September 12, 2025

Overview

BMS builds circular supply chains by turning industrial by■products into feedstocks.

This packet summarizes the business model, roadmap, and impact metrics.

Business Model

Revenue from material resale and service contracts.

Unit economics improve with scale and logistics efficiency.

Why Now

Regulatory and consumer pressure make diversion and traceability essential.

Cost savings plus ESG outcomes create dual value drivers for partners.

Use of Funds

Capital will be allocated to equipment, hub leases, initial staffing, and working capital.

Grant and blended finance will further accelerate hub deployments.

Impact Metrics

Tons diverted per month.

tCO₂e avoided.

Partner ESG reporting alignment.
